

I4C Week will encompass the **Summit**, **Side Events**, and **Marketplace**

**The Summit** is a 2-day conference featuring high-level keynotes, panel discussion, fireside conversations and structured networking. It will be a paid-for event for investors, policy makers, business leaders and entrepreneurs looking to accelerate climate-focused investment and solutions.

**Side events** will be organized around the Summit to provide additional capacity building, knowledge sharing and networking.

Partners and private sector participants will be welcomed to facilitate side events. Regional climate finance topics and business opportunities will be addressed and new trends and financial instruments presented.

**The Marketplace** is a networking and exhibition area that will offer an attractive and dynamic space for interested parties to showcase technologies and partnership opportunities, and for participants to network and engage in business oriented discussions. Innovative and technical Hubs will offer opportunities for exhibitors to present innovative solutions, products and sustainable projects to the audience.
