Reaching net-zero carbon emissions will present both a significant opportunity and an enormous challenge – both economically and socially - as a successful transition will require close between policy, technology and capital, as well as an effective engagement of both public and private sector.</p> <p>This event is part of a series of thematic events on the decarbonization of society within the framework of the Roadmap to Carbon Neutrality 2050. The event will focus on issues of social transition surrounding the output of the carbon neutrality roadmap. The work being developed in the context of the RNC2050 and the relevance of the just transition theme for the RNC will also be presented at the event.</p> <table border="1"> <tr> <td>15:00</td> <td>15:30</td> <td>Opening Session with Keynote Address</td> <td>H.E. <b>Ballroom Pedro Leitão, Upper Level</b>	<b>09:45</b>	<b>11:00</b>	<b>Industrial Decarbonisation - The Next Challenge</b>			
			European power sector emissions have decreased for the last six years in a row, whereas the latest data indicates industrial carbon emissions are going in the opposite direction. Decarbonising these sectors, whilst protecting jobs and growing the economy, will be the major climate challenge for Europe over the next decade. This session will look at how the EU ETS can simultaneously drive industrial decarbonisation and finance innovation in new, low carbon technologies.

			The adoption of the Paris Rulebook at COP24 in Katowice was a clear milestone for international climate action, but guidance for market cooperation (Article 6) under the Agreement was left out from the Rulebook and is now due for completion by COP25 in Santiago. This plenary will discuss the outcomes of COP24 and focus on what is needed to take Article 6 over the finish line in Santiago, analysing the way forward for markets.

<b>Ballroom Pedro Leitão, Upper Level</b>	<b>14:00</b>	<b>15:15</b>	<b>What are the Prospects for Future Links to the EU ETS?</b>			
			The European carbon market is on track to link to the Swiss ETS in early 2020, which will constitute the first link between the world's largest carbon market and another national cap-and-trade system. Meanwhile, 2018 saw announcements between the EU and California, China and New Zealand on closer carbon market cooperation. This session will explore the possibility for more linkages to the EU ETS in the future, and the benefits this could bring.

<b>Ballroom Pedro Leitão, Upper Level</b>	<b>15:30</b>	<b>16:30</b>	<b>Brexit: Boom or Bust?</b>			
			Depending on the outcome of Brexit, the UK may leave the EU ETS and implement a carbon tax, or create its own domestic carbon market which could link back to the EU system. Such a development would be unprecedented for the world's largest carbon market, which has only ever seen new countries join. Important questions will need to be addressed such as what impact this would have on UK emissions, could a domestic UK carbon market be established in time and what challenges would need to be addressed to link it to the EU ETS?

The Power &amp; Peril of Additional Policies</b></p> <p>Despite the recovery of European carbon prices and the reinvigoration of the market, some Member States are pursuing domestic measures – such as carbon price floors and coal phase-outs – to speed up the rate of decarbonization. These developments, along with higher European renewables and energy efficiency targets agreed in 2018, could destabilize the supply-demand balance in the EU ETS. Fernando Pessoa II, Lower Level	11:30	12:30	Carbon Pricing on the Rise: The Challenge of Safeguarding Competitiveness		
			As many regions progress with increasingly ambitious carbon pricing policies, the contrast with those regions that have no or minimal carbon pricing, becomes increasingly stark. This presents a real challenge for policy makers who are trying to maintain a level economic playing field and safeguard competitiveness. This session will explore what tools are currently being used to address this challenge, and what solutions might be implemented in the future as carbon prices continue to rise.		
			Moderator	Katie Sullivan Managing Director	International Emissions Trading Association (IETA)
			Speakers	Stephanie La Hoz Theuer Senior Project Manager	International Carbon Action Partnership (ICAP)
				Angela Churie Kallhaug Head of the Secretariat	Carbon Pricing Leadership Coalition

Fernando Pessoa II, Lower Level	12:45	13:30	Side Event Session: Mondo en Ekvilibro (OPEN EVENT)		
			Organised by Ekvilibro		
			Our platform combines legal security, digital technology and financial reward to ensure that important biomes are preserved. For instance rainforests, the world's source of oxygen, have been subjected to heavy and illegal timber for their valuable woods and agricultural clearance over the last 50 years. We want to stop this ecological disaster and transform the rainforest and its biodiversity into an asset which is more valuable than the wood or land. Our goal is to convince landowners not to deforest, who in return receive an initial reward payment, among other variables, as the sale of tokens emitted on their green areas occur.		
			Speakers	Guilherme Almeida	Ekvilibro
				Nilton Constantino Associate Partner	KPMG
Ballroom Pedro Leitão, Upper Level	13:45	14:45	Carbon Offsetting and Reduction Scheme for International Aviation (CORSA): What Does the Future Look Like for Aviation in Europe and Beyond?		
			CORSA aims to achieve ICAO's global aspirational goal of carbon neutral growth in aviation above 2020 levels. Four months after CORSA has entered into application, where are ICAO, operators and governments with the implementation of the scheme? What challenges remain to be addressed with the MRV and technical rules, the interaction of CORSA and EU ETS and issues around the double counting. It will also discuss the process foreseen to assess emissions units, and what interdependencies there are with UNFCCC, other market based measures and the broader carbon market.		
			Moderator	Edwin Aalders Senior Principal Scientist	DNV GL

Ballroom Lower Foyer Level	14:45	15:00	Short Break		
Ballroom Pedro Leitão, Upper Level	15:00	16:15	How can the EU ETS Support Higher Ambition by 2050?		
			In 2018 the EU published its long term GHG reduction strategy, which sets out pathways to achieving carbon neutrality by 2050 with negative emissions thereafter, and limiting warming to 1.5°C. Under the Paris Agreement, the EU will also need to communicate or update its NDC by early 2020. This session will discuss whether the EU's 2030 targets might be tightened, what this could mean for the EU ETS, and how the carbon market can help deliver a carbon neutral continent by 2050.
